

Let's Play it Safe!

At MY Museum the health and wellness of our visitors and staff is our top priority. We have updated and enhanced our cleaning procedures to align with the latest recommendations from local and state health officials.

Reduced Business Hours

We have changed our business hours to allow for more frequent deep cleaning between groups of visitors.

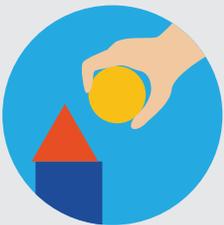

Enhanced Routine Cleaning

We are conducting routine cleaning of high-touch areas, common spaces, and exhibits. We use hospital-grade disinfectants along with other products used in our industry as best practices. In addition, the Museum is professionally deep cleaned regularly.

Sanitizing, Purifying & HVAC

We have always provided hand sanitizing stations around the Museum but recently added even more. We also encourage hand washing and sinks are located in the restrooms. Wash your hands for 20 seconds! The HVAC system will be at full capacity during business hours. New Merv filters have been added to each unit in addition to 6 air purifying units throughout the building that will accommodate the appropriate number of square footage.

Reduced Exhibit Manipulatives

We have greatly reduced the number of objects and toys throughout the Museum. Several exhibits have also been updated to make for a more sanitary experience. Costumes and some fabric exhibit pieces have also been removed. Please use the "ready to use" or "ready to clean" bins as needed.

Staff & Visitor Safety

Staff members and guests will be required to conduct a self-screening at home prior to arriving at the museum. If members have symptoms or are not feeling well, they should not visit MY Museum that day. All staff members will maintain a 6-foot distance from visitors and other employees. Visitors are required to wear a face covering at all times.

We look forward to seeing you back at MY Museum!
